Surface Treatments

Specialty Flame Retardants
Bulk and Softness Enhancers
Carboxymethyl Cellulose (Wide range of CMC's)
Guar Gums
Defoamers
Polyurethane Dispersions (PUD's for strength, sizing, hold out, abrasion resistance, aesthetic features etc.)

Coating Additives

Rheology Modifiers (Alginates, CMC's, Acrylics)
Defoamers
Lamlux GP 100 (Imparts improvements to coatings for brightness, gloss, higher solids, and improved rheology)
Titanium Dioxide
Polyvinyl Alcohol
Dispersants

Wet End Additives

Fast Hydrating CMC for pulper and continuous feed systems
Guars (Non-Ionic and Cationic for improved strength and runnability)
Sodium Sulfite (Oxidizer neutralization)
Persulfate based Re-pulping additives (Customized re-pulping packaging) – Chlorine Replacement
Defoamers
Saturating Aids
De-inking soaps and surfactants
