

Custom formulated winterized odor neutralizer for oilfield and industrial applications.

CamClean - Odor Blast EliteW

Odor Blast EliteW is highly efficient at chemically neutralizing odorous compounds such as mercaptans, short chain carboxylic acids, amines, thioethers, hydrogen sulfide and ammonia which are responsible for the majority of offensive odors.

Odor Blast EliteW is also effective in the reduction of BTEX to reduce explosion and enclosed space entry hazards.

In comparison to masking agents Odor Blast EliteW permanently neutralizes odorous compounds.

Odor Blast EliteW technology is also formulated for household, commercial, and agricultural applications.

Recommended Use

Odor Blast EliteW is best applied with a fine misting sprayer or fogger to ensure high surface area coverage. It can also be used in bulk liquid/gas phase applications such as vacuum trucks.

Oilfield Applications

Vac Trucks - Mercaptan & Thioether Scavenger

Topical spray for solids de-watering

Confined space entry for the reduction of BTEX and a range of other volatile hydrocarbons

Slop oil sites

Oilfield waste disposal

Drilling mud pits
